

SMARTBRIDGE SKILL WALLET

Coding & Solution

Date	04 July 2026	Team ID	
Project Name	Voice-Based-ConceptUnderstanding-Analyser		
Maximum Marks	5 Marks		

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

- Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
- The solution should address the core problem statement and implement the key functional requirements.
- Include all source files, configuration files, and setup instructions needed to run the application.
- Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/ramyamallavarapu/-Voice-Based-Concept-Understanding-Analyser/upload
Programming Language(s)	Python, JavaScript
Framework(s) Used	Flask / FastAPI, React.js
Key Features Implemented	Voice-to-text integration, Natural Language Processing (NLP) concept extraction, comprehensive accuracy analysis dashboard, and response feedback generation.
Pending / Incomplete Features	Real-time streaming audio analysis optimization, multi-language localization updates.
Setup / Run Instructions	1. Clone the repository. 2. Run 'pip install -r requirements.txt' for backend dependencies. 3. Run 'npm install' inside the frontend directory. 4. Follow instructions inside the repository README to execute installation scripts and launch local development servers.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes

2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The submission contains robust architecture, well-managed setup guidelines, and complete functional modules. Version control commits track development effectively. Excellent structure alignment with project definitions.
